[recipient address was inserted here]

[recipient name was inserted here],

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. **As** a constituent, I urge you to support competition and open access for local phone service. I trust the you to vote against this...if not, your choice will be reflected at election time as I am sending this to everyone I know!

Sincerely,

Sue S. Gabbard

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service. In addition, cable rates are increasing nationwide. Many seniors depend upon cable and Internet services for their only contact with the outside world. What with rising medical and prescription costs, we need a break, such as a senior discount on these rates. The cable providers are singularly apathetic, and cry all the way to the bank. help!!!!!!!!!!

Sincerely,

SYBIL F. RESNIK

The continual strain put on the resources of retired citizens living on fixed incomes is becoming too much. Congress and the president need to get on with improving the state of the economy by paying more attention to what it is costing for the average citizen to live day to day. The preoccupation of ensuring that the rich get additional tax breaks is just one of the many items where you are failing.

The Federal Communications Commission is considering taking actions that will restrict consumer choice by "deregulating" local phone service.

Over the last decade we have experienced the effects of "deregulation" on numerous industries and have found that as consumers we have gotten the short end of the stick!! Consumer Reports magazine recently had a revealing article studying 5 regulated industries and found that deregulation benefits the industries, not the consumer, as it was supposed to!

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

William Forbes
